

Aerius Quattro II 520
MAXIMUM Payload and Clearance
and Optimal Safety for Two
the Ultimate Choice

What you can't see makes the difference!
4 integrated air sponsons...

The **Aerius [Quattro II 520](#)** double (or **Commando** as it is known in military circles) and the **[Quattro I 490 SL single model](#)** are based on the Aerius Expedition design, but with one exceptional difference : they have 4 integrated air sponsons. This increases load capacity and maximizes buoyancy and safety. With fully inflated air sponsons, the hull shape changes from a V to a U. The latter mode allows for maximum payload and shallow water efficiency. See the difference in hull shapes in the figures below.

Military Application: The Klepper MK13 (equivalent to the civilian expedition model) was the official "stealth" kayak of NATO since 1953 and has been replaced by the four air sponson **Commando** known in its civilian version as the Quattro II 520 (also available in single, as the [Quattro I 490 SL](#)).

The rear loading hatch included on all Aeries Quattro II 520 is sealed with velcro flap and opens with a zipper as shown on this blue boat.

rear loading hatch

The Aeries Quattro II 520 can be sailed with the [Freewind Downwind sail and the S2 sail](#).

Standard Quattro II 520 Features Include:

- [black Hypalon hull](#) with 4 air sponsons
